EDUCATION

2025-2026 **ERASMUS+ Exchange at Technical University of Delft** (TU Delft, Netherlands)
Exchange during the fifth Semester of my Bachelor's Degree

2023 - 2026 **B.Sc. Computer Science at Technical University of Munich** (TUM, current)
current GPA 2.1

2014 - 2022 **Economic Secondary School of the Franciscan Sisters Wels**
"Wirtschaftskundliches Realgymnasium der Franziskanerinnen Wels"
A-Levels GPA 1.14
Pre-Scientific-Paper about "Neural networks and genetic algorithms using the example of N.E.A.T." (Grade 1.0)
Cambridge English Certificates:
- First Certificate in English (Grade A, Level C1)
- Certificate in Advanced English (Grade A, Level C2)

WORK EXPERIENCE

2024-2025 **Softwareengineer, Workingstudent for Hensoldt AG (nine months)**
Backend C++ and Python Development in the area of Drone-Defense

2023 **Content Management for FH OÖ Management GmbH** (two months)
Conversion from Typo3 to CraftCMS

2022-2023 **Civil Service at Lebenshilfe Wels** (nine months)
Supporting people with various mental impairments in a day care center

PROGRAMMING EXPERTISE

2025-2026 **Automatic LLM-based GP Consultation Summary Generation and Benchmark** at TU Delft
Project Development following the course 'Natural Language Processing' at TU Delft to generate SOAP notes based on a GP consultation transcript, with different approaches

2025-2026 **D3 Data Visualization of Steam Dataset** at TU Delft
D3 JS-based web application to display the value of video games based on preprocessed datasets using multiple visualization idioms and channels

2025 **Home price predictor and recommender** at HacakTUM 2025 (Interhyp Challenge)
Development of a web application to predict future home prices and provide users with detailed instructions on how to finance a given property in a set amount of time

2025 **Demining Management Software** at TUM Science-Hackathon 2025 (TUM Venture Labs Challenge)
Development of a management dashboard for local demining in Ukraine

2024 **Automatic Hedge-Trading Bot** at HackaTUM 2024 (Optiver Challenge)
Development of an optimized Hedge-Trading Bot for Optiver

2023-2026 **Algorithms and general Software knowledge,** Courses at TUM and TU Delft
Introduction to Software Engineering, Algorithms and Data Structures, Functional Programming and Verification, Fundamentals of Programming, Big Data Processing, Machine Learning, Natural Language Processing, Data Mining

2023 **Web Development for a local Surveying Company**
Front-End development of a company homepage

2021-2022 **N.E.A.T. AI Application** as part of my Pre-Scientific-Paper
Development of a FlappyBird clone in Python using PyGame
Implementing a N.E.A.T.-AI Model withsubsequent testing and evaluation

SKILLS & INTERESTS

Languages	German (native), English (C2), French (A2)
Programming Languages	C++, C, Java, Python, Scala, Ocaml, JavaScript (+React)
Interests	LLMs and GenAI, Embedded Software, Combat-Sports, Weightlifting, Running, Traveling
